

Stoner

Stoner® M883

PolyOut™ Polyurethane Release

Product Description

Stoner® M883 PolyOut™ Polyurethane Release is a versatile, silicone free release designed to release flexible molded foams. Also provides excellent results with in-mold coatings. The silicone free formula is compatible with many coatings resulting in less clean-up of parts.

M883 PolyOut™ Polyurethane Release ADVANTAGES:

- More mold up-time due to low build-up.
- Produces uniform open cell finish molded foams.
- Reduces skinning, voids, and wax burns seen with other mold releases.
- Versatile release can often be applied with existing equipment.
- Better productivity due to clog free spraying.

Uses

Stoner® M883 PolyOut™ Polyurethane Release is a release agent and anti-stick lubricant for flexible molded foams.

Direction for Use

Recommended Procedure

Initially apply 2-3 light coats to assure even coverage. Release should wet mold surface but should not pool or drip when applied at the correct amount. After each part, apply a light touch –up coat, making surface damp but not wet.

Cleaning: Excess M883 can be removed by wiping off a warm tool or with a solvent based mold cleaner such as Stoner® A497 Non-Flammable Cleaner or Stoner® B510 Polyoff.

Storage and Handling

Refer to MSDS for complete safety instructions. Use with adequate ventilation and keep away from sparks to other ignition sources. Wear gloves and safety glasses.

Packaging

Stoner® M883 PolyOut™ Polyurethane Release is available in:

- 5-gallon pails & 55-gallon drum Part # M883
- Totes available upon request
