

# Honey Slurry Wax

## General Purpose Mold Release Agent

## Product Description

**Honey Slurry Wax** is an economical, general purpose mold release agent designed for tooling surfaces not requiring a class A surface. **Honey Slurry Wax** is a “softer” version of **Honey Wax® Edge** and is typically used on the flange areas of molds, the edges of molds, on polymer concrete molds, or on cast polymer hat molds.

## Direction for Use

### Recommended Procedure

1. The mold surface should be thoroughly cleaned of all contaminants such as oils, grease, or dirt with **KantStik® Mold Cleaner**. The cleaned surface should be completely dry.
2. Using a clean dry rag or a China Bristle Brush, apply a layer of **Honey Slurry Wax** on the desired tooling surface.
3. When used as a flange, edge, or hat mold, it is not necessary to remove or buff the wax off the mold surface.
4. Once a part is pulled, apply **Honey Slurry Wax** as required.

## Storage and Handling

This product contains flammable solvents. Reseal the lid after each use. Store in a cool, dry place. Use in a well-ventilated area. Consult MSDS prior to use. Shelf life is 12 months from date of manufacture.

## Packaging

**Honey Slurry Wax** is available in:

- |                       |                     |
|-----------------------|---------------------|
| • Cases of 4x1-gallon | Part # P51201GLXXX2 |
| • 5-gallon pails      | Part # P51205PLXXX2 |
| • 55-gallon drum      | Part # P51255DRXXX2 |
