

Dissolve grease, dirt and dust from precision electronics with Stoner's

Heavy Duty ElectroKlene

► Stoner Heavy Duty ElectroKlene

94052 Heavy Duty ElectroKlene quickly loosens and removes heavy oil, grease, dust, dirt, and other residue from electrical and mechanical assemblies. Designed for high strength, heavy duty cleaning in electronic manufacturing, bench repair, and field service applications.

Heavy Duty ElectroKlene provides rapid and powerful cleaning of electronic equipment such as industrial controls, motors, computers, printers, office machines, TVs, stereo equipment, optics, and other precision instruments. It will not damage most PCBs, components or markings. The non-flammability and excellent dielectric properties of this solvent make it suitable for cleaning some equipment while in operation.

Heavy Duty ElectroKlene is formulated for solvent resistant components such as connectors, contacts, relays, tuners, servos, switches, solenoids, PCBs, motors, disc drives, capacitors, and similar electronic components. This high strength cleaner is NOT designed for use on polycarbonate, polystyrene, ABS, display panels, or other solvent sensitive materials or coatings.

► Product Benefits

- Evaporates quickly and leaves no residue.
- Non-flammable and non-conductive.
- Contains an environmentally friendly, non-CFC cleaning solvent.

Stoner Heavy Duty ElectroKlene

- Item #: 94052
- Net Wt. 12 OZ/341g
- Contains no ozone depleting CFCs
- Non-flammable/non-conductive
