

Stoner® Anti-Static Glass Cleaner

Field service technicians use anti-stat when maintaining automated kiosks and office technology.

A166 Anti-Static Glass Cleaner is a fast-acting, non-abrasive, foaming cleaner formulated to clean glass, computer screens, TV screens, CRTs, copiers, optical scanners, windows, windshields, and other glass surfaces. This foaming water-based formula removes tough dirt, dust, grease, toner, carbon, fingerprints, smudges, and other build-up.

Trial Results: Field service technicians performed a trial using Stoner Anti-Stat Glass Cleaner while on service calls. The thicker formula along with the effectiveness of the cleaner allowed for peak performance. Increased cleaning power also decreased downtime of machines during service.

A166 does not run or drip like messy liquid cleaners. The special foaming action keeps cleaner in place until wiped. It is harmless to virtually all plastic, glass, vinyl, and painted surfaces.

Opportunity: Field service operations that maintain ATM kiosks, gaming machines in casinos, office technology machines and managed print services.

Product Benefits:

- Dissipates static electricity and prevents build-up of static charges when used regularly.
- Powerful foaming action holds cleaner in place and reduces messy running and dripping.
- Versatile - cleans most hard surfaces.
- Leaves no streaks, haze, or film.
- Dries fast after wiping.

Stoner A166 Anti-Static Glass Cleaner foaming does not run or drip, holding cleaner in place.
