

**Stoner****Stoner®**  
**Heavy Duty Electro Klene**

## National circuit manufacturer for the defense industry chooses the advantages of ElectroKlene.

94052 Heavy Duty Electro Klene quickly loosens and removes heavy oil, grease, dust, dirt, and other residue from electrical and mechanical assemblies. Designed for high strength, heavy duty cleaning in electronic manufacturing, and field service applications.

**Trial Results:** A company specializing in providing electronic board design solutions for defense and aerospace manufacturing. Their highly skilled and efficient workforce provides exceptional electronic assemblies for aerospace and defense contractors.

Electro Klene provides a superior level of quality and security that is essential in the highly regulated industries of defense and aerospace manufacturing.

Stoner 94052 Heavy Duty Electro Klene is heavily used in electronic manufacturing

**Opportunity:** Heavy Duty Electro Klene is formulated for solvent resistant components such as connectors, contacts, relays, tuners, servos, switches, solenoids, PCBs, motors, disc drives, capacitors, and similar electronic components.

### Product Benefits:

- Evaporates quickly and leaves no residue.
- Non-flammable and non-conductive.
- Contains an environmentally friendly, non-CFC cleaning solvent.

*Available in Medium Duty - 94032*
