

Stoner Molding Solutions®
You Mold It. We Release It.™

A499

Powerful Precision Mold Cleaner

- Contains no chlorinated solvents such as trichloroethylene, or methylene chloride.
- Won't harm metals and solvent resistant materials. Always test before using.

Uses

A499 Non-Chlorinated Mold Cleaner is a powerful, fast acting, non-CFC, precision mold cleaner and degreaser that removes:

- Grease
- Oils
- Tars
- Resin Build-up
- Waxes
- Silicone Oils
- Inks
- Release Agents

For use in manufacturing process only. Not for use as a general cleaner.

Direction for Use

Recommended Procedure

Hold the can upright when spraying. Do not turn the can upside down or sideways when spraying or only the propellant will vent. If enough propellant is vented, can pressure could decrease to a point where the can will not spray. Shake the can well before using. Hold can 8 to 10 inches from mold surface. Direct sprayhead at mold surface and depress spray button. Difficult residue may require a second application.

Storage and Handling

Do not puncture or incinerate container. Do not expose container to heat or store at temperatures above 120 °F. This product is classified as nonflammable by ASTM testing method D3065-01. However, contents of this container can ignite under certain circumstances. Keep container away from and do not use near sparks, open flame, heated surfaces, or other ignition sources.

Packaging

A499 Non-Chlorinated Mold Cleaner is available in:

- 12 can case of 15 oz cans Part # A499
- 5-gallon pails Part # M499PL
- 55-gallon drum Part #M499DR

Product Description

A499 Precision Mold Cleaner is a fast acting, non-chlorinated cleaner and degreaser for molds and tooling. It contains powerful cleaning agents to remove resin build-up, grease, oils, waxes, inks, tars and silicone oils from molds, tools, and equipment. Dries fast and leaves no residue! A499 also removes finger marks from molds and tooling.

A499 has an extra powerful spray stream that precisely applies, dissolves, and flushes away most resin residues and release agents from metal molds. Cleans and prepares molds prior to application of rust preventives.

A499 contains no chlorinated solvents such as trichloroethylene or methylene chloride. Contains no ozone depleting substances.

A499 is used in the molding, and manufacturing industry for cleaning molds, tools, machinery, metals, and equipment. For high temperature use or applications requiring a non-flammable cleaner, try **Stoner A497 Non-Flammable Mold Cleaner**.

BENEFITS:

- Alternative to chlorinated solvents for precision cleaning of molds.
- Extra powerful spray stream.
- Powerful cleaner removes resin buildup, grease, oil, silicones, adhesives, wax, and contaminants from molds.
- Dissolves and flushes away most release agents from metal molds.
- Cleans and prepares molds prior to application of Stoner rust preventives.
- Quick evaporating. Dries fast and leaves no residue on molds.
