Investment Casting Solutions

Serving Molders Since 1942

Stoner INVESTMENT CASTING

E333 - No-Wash Wax Pattern Release (aerosol)

Allows you to eliminate the time-consuming steps of cleaning and etching wax patterns. With E333, you can go directly from your wax molding machines to primary slurry dipping. You'll save time, labor and the cost of purchasing and disposing of expensive chemical agents.

E733 - No-Wash Wax Pattern Release (spray tank)

E412 - Wax Pattern Release (aerosol)

Is an economical, non-flammable mold coating that provides fast, easy, consistent removal of even the most intricate wax patterns. It produces a very light, dry mist coating which reduces over-application and buildup on molds. Just one coat yields multiple releases, and leaves a high-quality surface finish.

E812 - Wax Pattern Release (spray tank)

Sprayer & Hose Kits for Spray Tanks

Disposable or refillable spray tanks are available.

- Magnetic mount lets you stick sprayer to the tank or your machine.
- 10 foot hose extends your range.
- Easy to hold and spray.

Individual components and replacement parts available:

Sprayer Assembly Item# 1DC3 and Hose Assembly Item# 1DC1 are sold separately.

B251 - Citrus Pattern Wash

Cleans and etches wax patterns, eliminating silicone, fingerprints, dust and contaminants which can cause imperfections. This highly-dilutable, water-based cleaner is available in 5-gallon and 55-gallon units. Made from extract of citrus fruits. Leaves a pleasant scent.
