

Stoner**Stoner®
Multi-Purpose Freeze Spray**

Two large international medical distributors prefer Stoner freeze spray for their customers.

94142 Freeze Spray quickly lowers surface temperatures to below zero °F so you can locate hot or defective electronic devices. Cools components to test for defects or intermittent failure. Contains 100% pure tetrafluoroethane.

Trial Results: Two international medical distributors reached out to Stoner for a cryogen spray they could use in their machines and sell to their customers.

- MP Freeze was the most cost effective option that allowed for market share gain and profit.
- The short order fill time allowed for less inventory commitment while still providing a high service

94142 Freeze Spray is used in medical and electronics.

MP Freeze Spray Opportunity: Freeze Spray has many uses in electronic manufacturing, maintenance, and repair. It solidifies or freezes viscous, fluid materials like bubble gum. Freeze Spray is harmless to metals, plastic, rubber, and critical electronic hardware. It leaves no residue, contains no CFCs, and is non-flammable and ozone safe.

Product Benefits:

- **Freezes surfaces to below -65 degrees Fahrenheit.**
- **10oz convenient size with acc u sol trigger and extension tube.**
