L-796/G415 Nix Stix Mold Release

Nix-Stix Mold Releases excel in Medical Applications x

Application: Medical tubing tip forming lubricant

Stoner has a unique product used for medical tip forming. Our Nix-Stix L-796 (Stoner G415) is a lubricant used by over 2 dozen industry leading medical companies to lubricate tubing as it is being formed into catheters. Typical use is to apply a small amount on pieces of tubing prior to processing by dipping parts or rolling them over a sponge.

The lubricant:

- allows better plastic flow
- less sticking
- longer die life
